# NEW FEATURE OF UHP SYSTEMS:

## DECON APPLICATION

We are excited to introduce this new feature to our Ultra High Pressure Systems!!

Our 10 GPM UHP System, running at idle, will use 5.5 gallons of water per minute, and the decon agent will be metered at 1%. EJ Metals is a distributor for military and all government agency-approved Hygenall ToxOff decontamination agent.

While the pump engine is running at idle, the water pressure is dropped to a safe level, so that an exposed hand can be held right up to the TriPlex UHP nozzle (spray pattern).

Now, not only can you fight fires, but afterwards, you can utilize the same system to safely and effectively decontaminate turnout gear, hoses, equipment and apparatus!

- Can be added to existing EJM UHP System
- 5 Gallon Jug of Decon Agent Provided
- Color Coded Tags for Easy Use

## CAN BE ADDED TO GASOLINE, DIESEL and HYDRAULIC ULTRA HIGH PRESSURE UNITS

Contact us at 920.779.9913  
or visit [www.ejmetals.com](http://www.ejmetals.com)  
for more information.
